

The [Center for Networked Systems](#) at the University of California San Diego prides itself on being a place for students and faculty to work closely with industry partners to identify emerging real-world problems and research new techniques, evaluations, methodologies, and technologies before these problems have become critical.

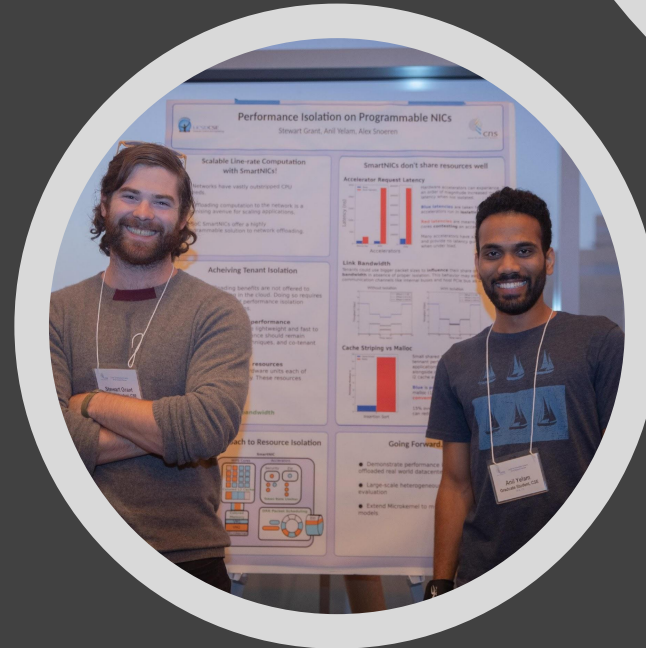

CNS is a hub of world-renowned researchers from UC San Diego focused on addressing critical real-world problems in modern computing and data processing infrastructure. Our expertise is across a wide range of applied research areas, including:

- storage system design
- network measurement and traffic analysis
- wireless networking
- cyber-physical security
- data-center networking
- cybercrime analytics
- scalable data processing
- programming language design

The testament to our approach is not only in the large numbers of CNS alumni practicing this research-oriented approach at our member companies but also in the direct impact we have had in driving technology adoption/standardization and influencing public policy.

CNS currently has 30 faculty members and approximately 80+ graduate students.

CNS Corporate Membership

CNS corporate membership is open to companies with research interests involving storage system design, network measurement, and traffic analysis, wireless networking, programming language design, cyber-physical security, data-center networking, cybercrime analytics, scalable data processing and related fields

The standard CNS membership gift level is \$20,000.

Companies under 500 employees should contact us to discuss reduced membership gift levels.

For CNS corporate membership, please contact us.
cns@ucsd.edu.

Poster session and reception at the CNS Research Review.

CNS Membership Privileges:

- Invitation for two representatives to the annual CNS Research Review at UC San Diego.
- Membership recognition (name/logo) in print and on our website, including materials for the CNS Research Review.
- Notices and recordings of CNS lectures.
- Opportunity to explore and discuss potential sponsored research of mutual interest.
