

CNS Research Review at UC San Diego (2025)

The Center for Networked Systems at the University of California San Diego prides itself on being a place for students and faculty to work closely with industry partners to identify emerging real-world problems and research new techniques, evaluations, methodologies, and technologies before these problems have become critical.

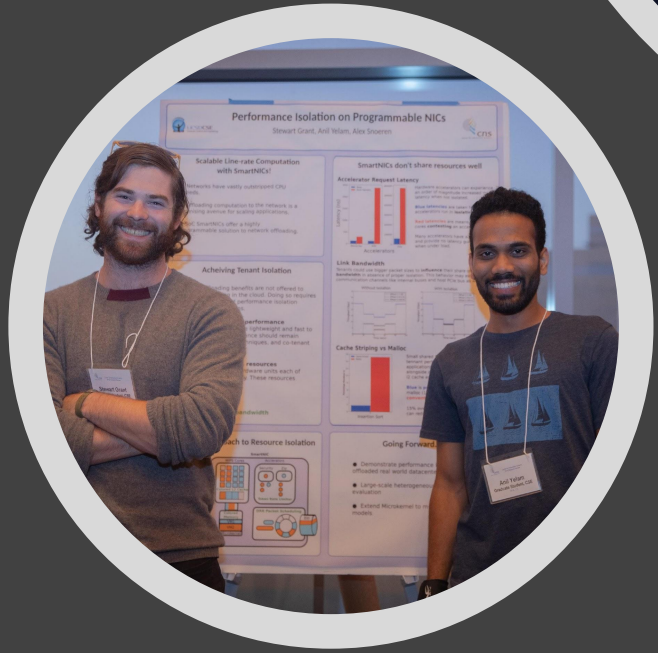

CNS faculty bring deep and overlapping expertise across the full spectrum of networked systems research. Their work spans foundational areas like network measurement and cybercrime analytics. It also extends into fields like cyber-physical security, embedded systems, and data-center-scale infrastructure. This breadth means member companies gain access to research spanning the entire modern computing stack, from hardware and storage to distributed systems and policy-relevant security analysis.

The testament to our approach is not only in the large numbers of CNS alumni practicing this research-oriented approach at our member companies but also in the direct impact we have had in driving technology adoption/standardization and influencing public policy.

CNS currently has 25 faculty members and approximately 55+ graduate students.

CNS Corporate Membership

CNS corporate membership is open to companies with research interests involving storage system design, network measurement and traffic analysis, wireless networking, programming language design, cyber-physical security, data-center networking, cybercrime analytics, scalable data processing and related fields.

The standard CNS membership gift level is **$20,000**.

Companies under 500 employees should contact us to discuss reduced membership gift levels.

For CNS corporate membership, please contact us. cns@ucsd.edu.

Poster session and reception at the CNS Research Review.

CNS Membership Privileges:

- Two company representatives to attend the annual CNS Research Review, including complimentary meals and parking during the event. (*fair market value: $378.74/representative)*.
- Membership recognition (name/logo) in print and on CNS website, including in materials for the CNS Research Review.
- Notices and recordings of CNS lectures.
- Opportunity to explore and discuss potential sponsored research of mutual interest (subject to separate agreement).

All membership gifts should be directed to The Regents of the University of California in support of the fully expendable fund entitled **CNS Research Support (RN584)**. Of the total gift contribution, $757.48 is non-tax deductible.
